 2. Mapa sajta
 3. Slike stranica i opis funkcionalnosti
3. Kodovi:

Uvod

Korišćeni programski jezici su: HTML, CSS, SASS, JavaScript, SASS.

Biblijoteke: jQuery.

Framework: Bootstrap.

Nije korišćen template za izradu sajta. Ceo sajt je ručno izrađen.

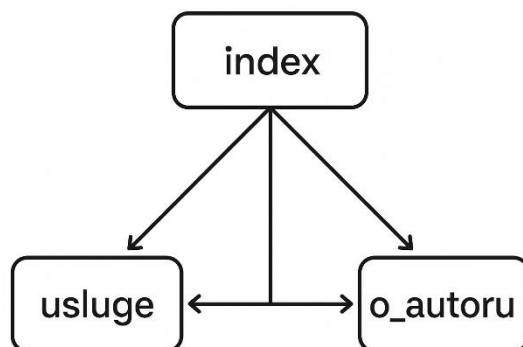

Napomena: u kodu su ostavljeni detalji opisi kroz komentare.

Funkcionalnosti:

- Dinamički ispis navigacionog menija,
- Dinamički ispis ikonica u navigaciji sajta,
- Dinamički ispis hero sekcije,
- Dinamički ispis kartica usluga,
- Dinamički ispis, validacija i regularni izrazi forme u modalu ,
- Dinamički ispis dropdown liste u formi,
- Dinamički ispis ikonica u zaglavlju sajta,
- Dugme za vraćanje na vrh strane odrađen pomoću jQuery-a,
- Loader stranica pomoću jQuery-a,
- FAQ sekcija sa interaktivnim blokovima.

Organizacija

Organizaciona šema:

Mapa sajta:

Slike stranica i opis funkcionalnosti:

U prvom planu je ideja modularnosti i lako održivog sajta, tako da je kod JavaScript-a i SASS-a podeljen u delove (partials). Trenutno sajt nema odgovarajuću backend podršku, a pravljen je sa ciljem da se takva funkcionalnost može dodati u nekom narednom periodu.

Glavne funkcionalnosti sajta su: dinamički ispis različitih sekcija sajta, prikaz modala sa formom koja kupi podatke iz bloka na koji je akcija izvršena, animacije i loader strane kao neka vrsta lazy load sistema.

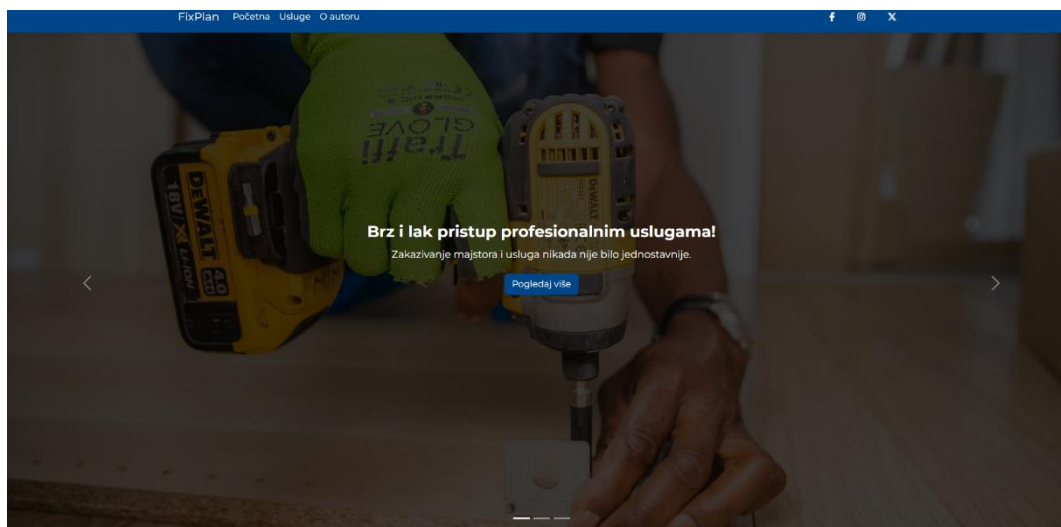

Sajt sadrži dinamički ispis različitih sekcija koji su realizovani kroz JavaScript, a to su sekcije: navigacije, hero sekcija, kartica za prikaz usluga, ikonice sa animacijama u zaglavlju.

Navigacija se ispisuje dinamički kroz listu koja se u istom fajlu i dodaje, a informacije koje se dodaju su url/skug i tekst koji će se prikazivati u navigaciji. Takođe, navigacija ima svoju posebnu animaciju gde se nakon skrolovanja strane, sama navigacija postaje providna, a prelaskom miša preko nje u takvom položaju se ta providnost uklanja. Treba naglasiti da je ova animacija podržana samo na višim rezolucijama ekrana.

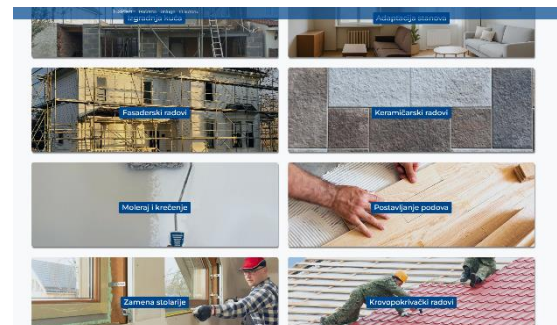

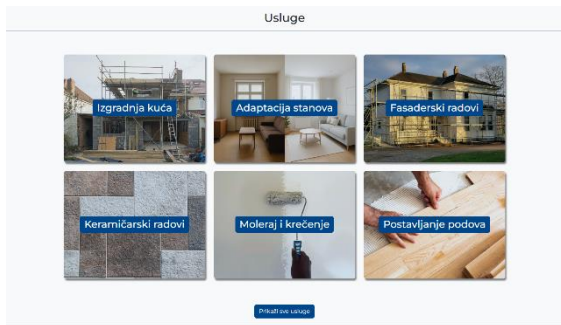

Ikonice unutar navigacije se ispisuju dinamički kroz JavaScript. Moguće je dodati dodatne ikonice na jako lagan način kroz listu ikonice unutar istog fajla.

Na sličan način je odrađena i hero sekcija koja u sebi ima carosel, odnosno sekcija od 3 slike koje se mogu menjati ručno na dugmiće ili automatski nakon određenog vremenskog intervala. Informacije se takođe dodaju u listu unutar izdvojenog fajla za hero sekciju i to su: aktivni status (da li je trenutno baš taj blok aktivan), putanja do slike, alternativni tekst slike, naslov i tekst carosel-a. U ovu grupu slično napisanih automatski generisanih sekcija takođe treba svrstati i ikonice u footeru koje se na sličan način mogu dodati u izdvojenom JavaScript fajlu.

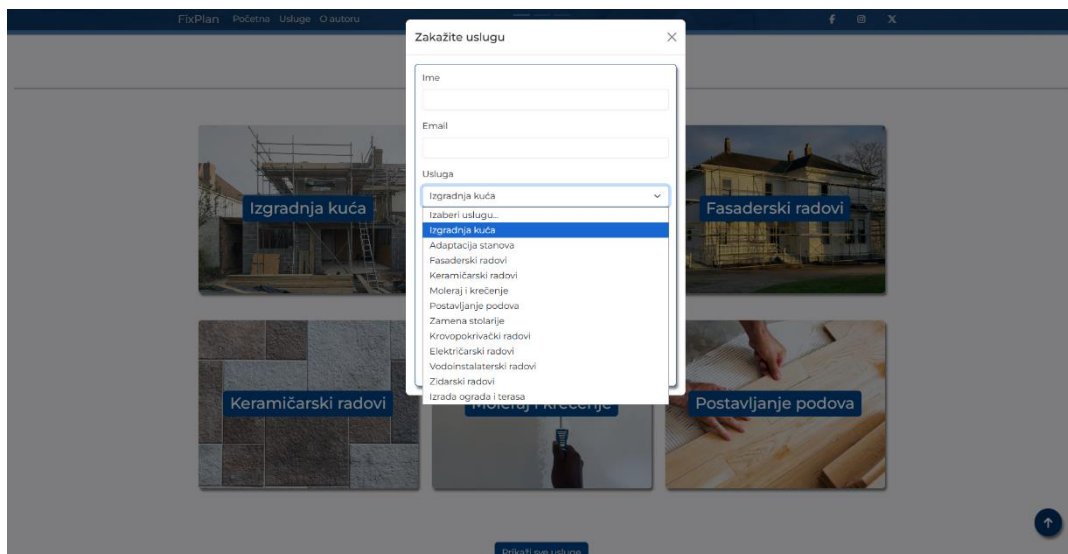

Kartice za prikaz usluga funkcionišu na sličnom principu generisanja koda, sa malim razlikama. Zbog broja informacija koje se nalaze unutar samih kartica je izdvojen poseban fajl sa listom usluga u JavaScript skupu fajlova u koju se dodaju informacije. Ovaj deo koda u realnoj primeni bi bio prosleđen sa servera i iz tog razloga radi lakše moguće adaptacije je taj fajl izdvojen, a fajlovi koji generišu kartice su izdvojeni. Postoje 2 vrste kartica koje se prikazuju, veće i manje kartice i one su odvojene. Nije isti izgled kartica na indeks strani i na strani usluga.

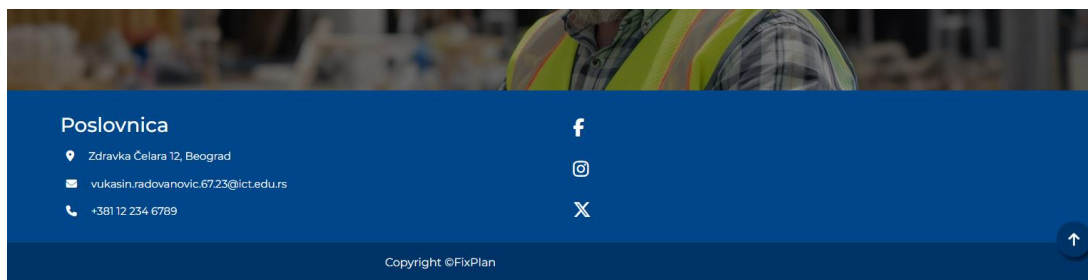

Prikaz modala sa formom za odabir usluga se pojavljuje klikom na bilo koje dugme na kome piše „zakaži uslugu“ i odrađena je sa proverom svih polja iz ugla klijentske strane. Takođe, treba napomenuti da se forma modala dinamički pravi unutar JavaScript fajla. Informacije o tipu usluge se prosleđuju formi nakon klika na uslugu. Takođe je odrađena provera forma sa ispisom greške na klijentskoj strani pomoću regexa.

Dinamičko ispis u dropdown formu se vrši automatski preko dugmeta koje je pritisnuto na stranici, a same informacije se vuku iz liste kartica.

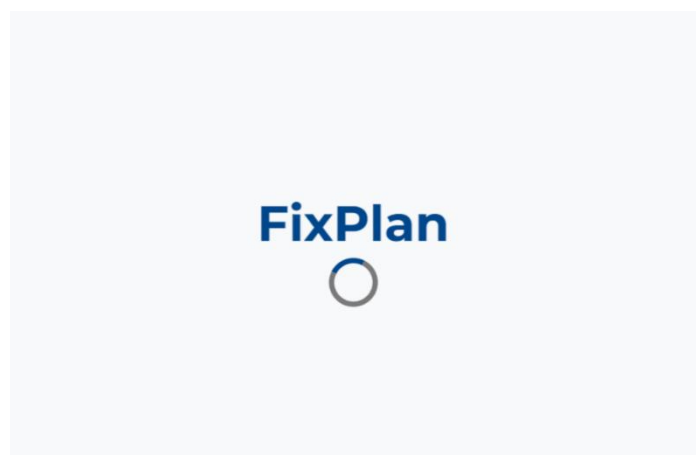

U zaglavlju sajta se animirane ikonice za društvene mreže generišu preko JavaScript i preko SASS-a, u kombinaciji.

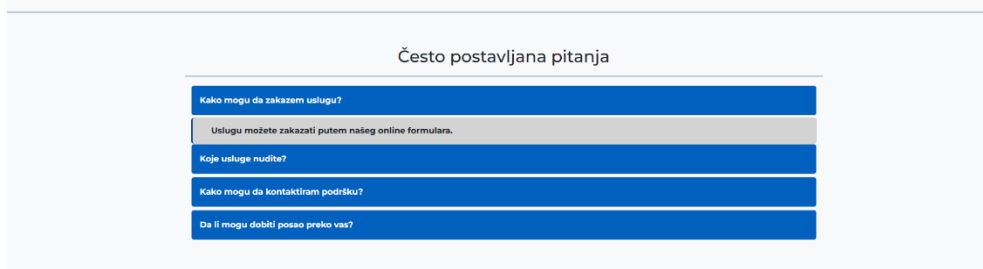

Takođe, preko jQuery-ja je odrađeno i dugme za vraćanje na vrh strane.

Loader za učitavanje stranice je odrađen preko jQuery-ja i služi kao vrsta lazy učitavanja strane. Otvara se na svakoj stranici i traje kratak period.

Sekcija za najčešća postavljena pitanja (FAQ) je odrađena preko JavaScript. Prilikom klika na pitanje automatski se otvara blok sa odgovorom na to pitanje. Takođe se dinamički ispisuje i preko liste mogu da se dodaju nova pitanja i odgovori.
